

IN-PERSON

Dementia Care Champion Courses

Learn the Positive Physical Approach™ to improve connections, relationships, and task completion.

In these highly interactive sessions, learners will:

Champion Course 1:

- Receive hands-on skill building for immediate application
- Learn cues that can increase productivity and reduce challenges
- Learn modifications to reduce distress and encourage acceptance of assistance
- See the physical and chemical changes in the brain and learn how it changes a person's abilities to experience the world around them

Champion Course 2:

- Learn to do WITH rather than TO with Hand-under-Hand® (HuH)
- Practice the HuH® guidance and support method
- Gain greater awareness and knowledge about how to support your partner and to help them maintain their own skills

Champion Course 3:

- Gain a greater awareness and knowledge of the different GEMS® states
- Interact with GEMS® states to help caregivers, mental health professionals, and therapists understand and focus on retained ability, not loss
- Use the Positive Physical Approach to assess and adapt to build relationships
- Build a sense of control and self-direction for each of the six GEMS® states

Champion Course 4:

- Develop their ability to observe and recognize a person's GEMS® state
- Practice skills to recognize and interact effectively when brain changes occur
- Focus on the Positive Physical Approach™ as a dynamic assessment of an individual's cognitive levels and personal preferences
- Identify the characteristics and what it means to be living in the world with changes in cognitive and physical abilities
