When dementia makes it harder to communicate with words, behaviors can often tell us what a person is trying to express.

Using the **A-B-C approach** – “**All Behavior is Communication**” – this presentation will help attendees better understand what may be behind those behaviors and how to respond with compassion.

PRESENTED BY:

Sheri Fairman, Dementia Care Solutions

Sheri is a nationally recognized dementia educator and care partner advocate with more than a decade of experience supporting people living with dementia and those who care for them.

THURSDAY, OCTOBER 15TH | 2:00 PM

DURING THIS PRESENTATION, YOU'LL LEARN HOW TO:

- Look beyond behaviors to identify possible unmet needs
- Recognize behaviors as a form of communication
- Better understand how brain changes can affect expression
- Respond with practical, compassionate communication strategies
- Create more positive and supportive interactions

After the presentation, stay for a tour of Caretta Bellevue, meet our team and see firsthand what makes our community a welcoming place to call home.
